AIR VELOCITY SENSOR

Product code: 105-00019

The F400 Series sensor is a versatile, resistant and high-performance sensor that determines air velocity and air temperature, and displays the data in both analogue and digital form.

Suitable for demanding applications. Single hole mounting for ease of installation.

- Know the speed at which air flows through air inlets or tunnel air inlets, at all times.

- The Zaxe F400 Air Velocity Sensor will give you the exact air speed.

- Precise

- Resistant to splashes and UV radiations

- 1 year warranty

- Resistant to corrosive or alkaline environments.
