

AMMONIA SENSOR

Product code: 105-00023

The **Zaxe** Ammonia Sensor has been specifically designed for continuous measurement of ammonia (**NH₃**) concentration in livestock houses, providing accurate measurements of ammonia at low and high concentrations, without requiring any calibration.

The sensor can be installed inside the farm without any need for tubes nor pumps.

- With the Zaxe Ammonia Sensor, farmers are now able to counteract the negative effects of high ammonia concentration by monitoring it continuously and take corrective action if ammonia levels are increasing.

- Very accurate NH₃ measurements
- Resistant material for a longer product lifespan
- Easy to set up
- No calibration needed
- 1 year warranty
