

BRASS WATER METER

Product code: 102-00001

Brass water meters can only be used with **POTABLE COLD WATER** up to **120°F (50°C)** and working pressures up to **150 psi**.

The meter can register between **98.5%** and **101.5%** at normal and high flows, and between **97%** and **101%** at the **AWWA** standard low flow.

Accuracy tests are made before shipment, so no adjustment is needed before installation.

- Registers data on a compatible controller
- Installation: 5/8" x 3/4"
- 1 year warranty

- Detects water damage when connected to an intelligent controller.
- Data can be used to detect anomalies and diseases.

- Must be installed horizontally
- Available by the liter or the gallon
- No adjustment needed before installation
