

RELATIVE HUMIDITY SENSOR

Product code: 105-00001

The **Zaxe** Humidity Sensor is a highly accurate sensor for measuring relative humidity. Designed with **4-20 mA** outputs, it has a low output resistance, full protection against short circuits and wiring problems.

The special sensor element and the built-in filter enable accurate reading of humidity in livestock buildings. The sensor is delivered with the required cable for easy installation.

- The most reliable humidity sensor on the market!
- The sensor is controlled by a microprocessor and has a bi-colour light emitting diode (LED) to indicate operating status and error diagnostics.

- High precision
- 4-20ma signal
- Easy to set up
- 1 year warranty
