

FEEDING SYSTEM

Farrowing

A state-of-the-art feeding system for **farrowing** sows developed by a team of experts including veterinarians, nutritionists, engineers and producers.

Choose a complete **SCALABLE** system with unsurpassed accuracy.

Best warranty of the industry

Feeder **3P** PRÉCISION
PERFORMANCE
PRODUCTION
Zaxe Technologies

- ⌘ **Feeder suitable** for any type of feed: mash or pellets.
- ⌘ **Rotating three-hole plate** that allows to distribute small quantities of feed, for great precision.
- ⌘ **Unique and patented** smart “bobble head” feed drop detector that confirms that the sow has been fed.
- ⌘ **Activation of the feeder** when the sow’s tag is read.
- ⌘ **Measurement of the quantity** of feed in the feeder by reading of the amperage. Based on the set parameters, the activation of the feeder will be triggered by the controller.

Antenna

- ⌘ **Sturdy**, low maintenance.
- ⌘ **Accurate and efficient** reading of electronic tags.
- ⌘ Support of **HDX and FDX technology**.
- ⌘ From gestation to farrowing, **automatic data transfer** without requiring any manual input:
 - Sow's **feed matrix**
 - Location **assignment**
 - **Production data**

Maximus Controller

The power to easily manage all parameters.
Stay connected in real time to your farm.

- **Customized feeding matrix** based on body condition, parity, number of gestation and lactation days.
- **Possibility to create different feed budgets**, curves and schedules.
- **Continuous communication** with the entire feeding system: bin, feed line, etc.
- **Management of room/pen temperatures.**
Piglet detection.
- **Management of heating lamps** (variable or On/Off).
- **Management of heat mats.**
- **Instantaneous alarms** that flag any system irregularity.
- **Real-time data import** and customizable report generation.

Maximus Software

Proactive management based on accurate data.

- **Complete integrated system** - controller and management software.
- **Complete production monitoring system**: sows, nursery and finishing.
- **Mobile application** that lets you enter data in real time.
- **Cloud-based backup** – Access your data 24/7.
- **Complete history of the sow** throughout her production cycle.

A unique feeding system that guarantees optimal production and a quick return on investment.
